

HA6011/1

General Description

The HA6011/1 is a high power amplifier modul for applications in Ku-Band.

The high gain and high output power makes this device an ideal choice as a high power amplifier for transmitters in the frequency range from 8.0GHz to 12.0GHz. It includes a power monitor output for transmitted power, temperature sensor, reverse polarity and output short circuit protection.

The device operates from -10°C to $+40^{\circ}\text{C}$.
