A78RxxPIC

LDO Fixed Regulator IC

Description

The A78Rxx Series is a low dropout voltage regulator suitable for various electronic equipments. It provides constant voltage power source with TO-220F-4SL lead full-mold package. Dropout voltage of A78Rxx Series is below Max .0.5V in full rated current (1A). This regulator has various functions such as current limit protection, over voltage protection and output on/off control.

Features

- 1A output low dropout regulator
- TO-220F-4SL full-mold package (4pin)
- Current limit protection
- Over voltage protection
- Thermal Shutdown Protection
- With output on/off control (At typical 1.5V)
- Control pin open or high signal, output on

Pin Connection

1. INPUT
2. OUTPUT
3. GROUND
4. ON/OFF CONTROL
