Tinkerkit Text LCD – 16x02 Retail

Code: T110061

With the TKLCD module you can write text on the module's screen in a few minutes. It has an LCD display on board and it requires a dedicated software library that is available on [tinkerKit! website](#).

The LCD can be used like a regular module by plugging it into the TinkerKit! shield or as an independent component; it has in fact a [microcontroller](#) and a USB port on board that make it a fully-fledged LCD-shaped Arduino Leonardo.
