

# HA178L00 Series

3-terminal Fixed Voltage Regulators

**HITACHI**

ADE-204-051 (Z)

Rev. 0

Dec. 2000

## Description

The HA178L00 series three-terminal fixed output voltage regulators. Can be used not only as stabilized power sources, but also as Zener diodes because of their small outline package.

## Features

- Maximum output current: 150 mA ( $T_j = 25^\circ\text{C}$ )
- Large maximum power dissipation: 800 mW
- Overcurrent protection
- Temperature protection circuit

## Ordering Information

Application	Standard Output Voltage Tolerance $\pm 8\%$	A Version Output Voltage Tolerance $\pm 5\%$
Industrial use	HA178L00P	HA178L00PA
Commercial use	HA178L00	HA178L00A HA178L00UA

## UPAK Product (HA178L00UA) Mark Patterns

The mark patterns shown below are used on UPAK products, as the package is small. Note that the product code and mark pattern are different. The pattern is laser-printed.

- Notes:
1. Boxes (1) to (5) in the figures show the position of the letters or numerals, and are not actually marked on the package.
  2. (1) and (2) show the product-specific mark pattern. (see table 1)

**Table 1**

Output Voltage (V)	Product No.	Mark Pattern (2 digit)
2.5	HA178L02UA	8A
5	HA178L05UA	8B
5.6	HA178L56UA	8C
6	HA178L06UA	8D
8	HA178L08UA	8E
9	HA178L09UA	8F
10	HA178L10UA	8G
12	HA178L12UA	8H
15	HA178L15UA	8J

3. (3) shows the production year code (the last digit of the year).
4. (4) shows the production month code (see table 2).

**Table 2**

Production Month	1	2	3	4	5	6	7	8	9	10	11	12
Marked Code	A	B	C	D	E	F	G	H	J	K	L	M

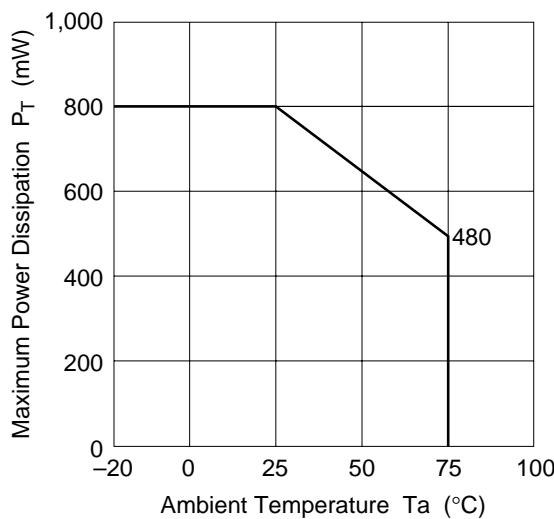

5. (5) shows the production week code.

## Cautions

1. Hitachi neither warrants nor grants licenses of any rights of Hitachi's or any third party's patent, copyright, trademark, or other intellectual property rights for information contained in this document. Hitachi bears no responsibility for problems that may arise with third party's rights, including intellectual property rights, in connection with use of the information contained in this document.
2. Products and product specifications may be subject to change without notice. Confirm that you have received the latest product standards or specifications before final design, purchase or use.
3. Hitachi makes every attempt to ensure that its products are of high quality and reliability. However, contact Hitachi's sales office before using the product in an application that demands especially high quality and reliability or where its failure or malfunction may directly threaten human life or cause risk of bodily injury, such as aerospace, aeronautics, nuclear power, combustion control, transportation, traffic, safety equipment or medical equipment for life support.
4. Design your application so that the product is used within the ranges guaranteed by Hitachi particularly for maximum rating, operating supply voltage range, heat radiation characteristics, installation conditions and other characteristics. Hitachi bears no responsibility for failure or damage when used beyond the guaranteed ranges. Even within the guaranteed ranges, consider normally foreseeable failure rates or failure modes in semiconductor devices and employ systemic measures such as fail-safes, so that the equipment incorporating Hitachi product does not cause bodily injury, fire or other consequential damage due to operation of the Hitachi product.
5. This product is not designed to be radiation resistant.
6. No one is permitted to reproduce or duplicate, in any form, the whole or part of this document without written approval from Hitachi.
7. Contact Hitachi's sales office for any questions regarding this document or Hitachi semiconductor products.
