Description

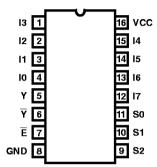

The Harris HCS151MS is a Radiation Hardened 8-Input Multiplexer having three binary control inputs (S0, S1, S2) and an active low enable $(\overline{\mathbb{E}})$ input. The three binary signals select one of eight channels. Outputs are both inverting and non-inverting.

The HCS151MS utilizes advanced CMOS/SOS technology to achieve high-speed operation. This device is a member of radiation hardened, high-speed, CMOS/SOS Logic Family.

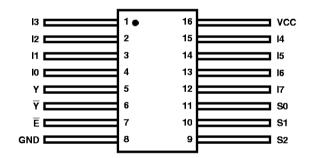

The HCS151MS is supplied in a 16 lead Ceramic flatpack (K suffix) or a SBDIP Package (D suffix).
