

**PRELIMINARY****Three Channels Video Driver****■ DESCRIPTION**

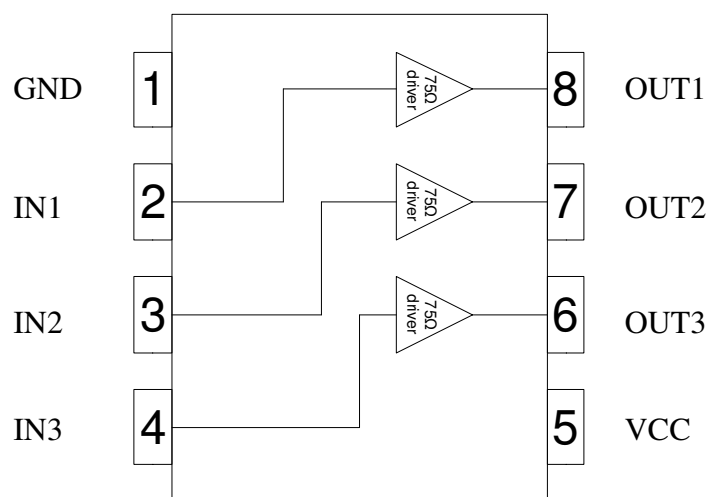

AA7623SP is a three channels video driver, with  $75\Omega$  output buffer, and it supports 5V operation voltage. The  $75\Omega$  buffer is capable of driving two circuits. The DC potential for the previous stage can be used for direct DC-couple, because the input is coming directly with no internal bias or clamp. The IC is available in **8-pin SOP** package.

**■ FEATURES**

1. Composite video driver
2. Support 5V operation voltage
3. Three channels video driver
4. Output short circuit protection function
5. A load sufficient for driving two circuits
6. Low operating current, 17mA typical
7. SOP-8 package
8. DC-Couple output

**■ APPLICATION**

- VCR
- Video Camera
- TV
- Video Player
