SPECIFICATION NOTES

- Parts are 100% tested for capacitance range and dielectric withstanding voltage.
- Capacitance range specified is that which is guaranteed, and is measured at 1 MHz at room temperature.
- Q factor is measured at maximum rated capacitance and at room temperature.
- Dielectric strength is measured at maximum rated capacitance and room temperature, with test voltage (as listed for each model) applied for 60 seconds.
- Insulation resistance is measured at maximum rated capacitance and room temperature and at rated voltage, unless otherwise specified.
- Temperature coefficient of capacitance (TCC) is measured at 1 MHz over the operating temperature range, with capacitor set at maximum rated capacitance.
- Axial load during tuning should not exceed 200 grams force. At maximum axial load, capacitance change is no more than 15%.
- Capacitors should not be operated outside of rated capacitance range and working voltage.

Soldering and Cleaning

of FILMTRIM® Trimmer Capacitors

Soldering Methods

- Reflow soldering for GSX series
Pre-heat: 140°C ±10°C for 2 to 3 minutes.
Soldering: 200 to 250°C within 25 seconds.
(Peak soldering temperature: 250°C maximum).
- Dip soldering (does not apply to GSX models)
260°C ±10°C for 7 seconds maximum.
- Hand soldering (for lead-through-hole models)
Soldering: Tip temperature 350°C ±10°C for 3 to 4 seconds
- Hand soldering (GSX models)
Preheating: Fully preheat on a hot plate with a surface temperature of 100 to 150°C.
Soldering: 260°C ±10°C for 5 seconds maximum.

Cleaning

- Water soluble fluxes and detergents with a water flush after soldering of the boards can be used for GX, GY and GZ models.
- Do not immerse FILMTRIM models in chlorinated or fluorinated hydrocarbon solvents as this would adversely affect the plastic dielectrics and base materials. Some customers have successfully used GX models in scrubbers or sprayers where only the bottom of the printed circuit boards is exposed to solvents. If the process requires immersion in solvents for cleaning boards, the FILMTRIM capacitors should be hand soldered to board after the boards have been cleaned.
