## **Description**

A miniature RF Meter which can be used to show the presence of a Radio Signal.

Briefly press the power switch and the LED bargraph shows the RF activity within the local environment.

The peak signal is held for 1 second. This can be invaluable when installing a Radio system to determine if other RF signals are present (interference) and also validate the signal strength of the radio transmitter to be installed. Green represents a strong RF signal and red represents a weak RF signal.
