## DESCRIPTION

The P7609 family comprises medium current, unshielded power inductors available in eight low profile sizes (2.2-5.4mm).

The range covers three decades of values from 1µH to 820µH, and provides very cost-effective and compact solutions for medium power applications.

In this family Pb-free electrodes are directly plated onto the ferrite. Such terminations provide excellent solderability, terminal strength and heat resistance.

The P7609 family is compliant with RoHS Directive 2002/95/EC, and suitable for lead-free and conventional placement and reflow.

**Notes**

1. Inductance measured at 1V, 2.5MHz (10-82 $\mu\text{H}$ ), 1kHz (100 $\mu\text{H}$ -1mH).
2. Rated Current,  $I_{\text{DC}}$ , is the current at which the temperature rise is 40°C (max) or the DC current at which the zero-current inductance drops by 10% max, whichever is lower.
3. Operating temperature -25°C to +85°C.
4. For non-standard inductance values, please contact Profec.
