Notes

- 1 All specifications typical at $T_a=+25^\circ\text{C}$, resistive load, 115VAC, 60Hz input voltage and after warm-up time rated output current unless otherwise noted.
- 2 Ripple & Noise measurement bandwidth is 0~20 MHz
- 3 These power modules require a minimum output loading to maintain specified regulation, operation under no-load conditions will not damage the power supplies however they may not meet all listed specifications.
- 4 Other input and output voltage may be available, please contact us for custom solution
- 5 Peak current can't be drawn from all output at the same time.
- 6 Floating (or isolated) output of a power supply that is not connected to any other output.
- 7 Specifications are subject to change anytime without notice
