### DESCRIPTION

P5342 is a low distortion transformer for ADSL over ISDN (Annex B) applications.

P5342 is certified to IEC 60950 and UL 60950 for supplementary insulation for a primary circuit, 250V working voltage. P5342 is a UL Recognized Component and is supported by an IEC CB Test Certificate. The part is completely lead-free, compliant with RoHS Directive 2002/95/EC, and suitable for lead-free and conventional processing.

The safety system yields very low transformer parasitics, ensuring that P5342 exhibits excellent frequency response and balance; in combination with its good harmonic distortion performance, P5342 is ideally suited to low cost yet demanding ADSL applications.
