PRODUCT DESCRIPTION

The AGB3306 is one of a series of high performance InGaP HBT amplifiers designed for use in applications requiring high linearity, low noise and low distortion. No external matching components are needed for insertion into a 50Ω system. With a high output IP3, low noise figure and wide band

operation, the AGB3306 is ideal for wireless infrastructure applications such as Cellular Base Stations, MMDS, and WLL. Offered in a low cost SOT-89 surface mount package, the AGB3306 requires a single supply voltage, and typically consumes 0.25 Watts of power using a +8 V supply.

ELECTRICAL CHARACTERISTICS

Table 2: Absolute Minimum and Maximum Ratings

PARAMETER	MIN	MAX	UNIT
Device Voltage (V_{CC})	0	+6	VDC
RF Input Power (P_{IN})	-	+10	dBm
Storage Temperature (T_{STG})	-40	+150	°C
Junction Temperature	-	+200	°C

Stresses in excess of the absolute ratings may cause permanent damage. Functional operation is not implied under these conditions. Exposure to absolute ratings for extended periods of time may adversely affect reliability.

Table 3: Operating Ranges

PARAMETER	MIN	TYP	MAX	UNIT
Operating Frequency (f) ⁽¹⁾	-	-	7000	MHz
Supply Voltage (V_{SUPPLY}) ⁽²⁾	-	+8	-	VDC
Case Temperature (T_C)	-40	-	+85	°C

The device may be operated safely over these conditions; however, parametric performance is guaranteed only over the conditions defined in the electrical specifications.

Notes:

- (1) Operating frequency is defined by the output return loss (S_{22}) having a VSWR less than 2:1.
- (2) Voltage applied through a bias resistor and inductor. Refer to Figure 3. For other supply voltages, see the APPLICATION INFORMATION section.

Notes:

- (1) OIP3 is measured with two tones at 1 MHz spacing at 0 dBm output power per tone.
- (2) The value for Thermal Resistance is based on a Device Voltage (V_{CC}) of +3.8 Volts.

APPLICATION INFORMATION

The AGB3306 is optimized for a bias current of 33 mA. Using a +8 V supply, a bias resistor (R_S) of 120 Ω will provide the appropriate bias (see Figure 3). Table 5 shows the recommended value of R_S for other supply voltages.
