|----------------|---|---------|------------------------|---|
| m              | Mass Standards 4)   | approx. | 60<br>EN 50178         | g |

#### **Features**

- Hall effect measuring principle
- Galvanic isolation between primary and secondary circuit
- Isolation voltage 3000 V~
- Low power consumption
- Extended measuring range (3 x I<sub>DN</sub>)
- Insulated plastic case made of polycarbonate PBT recognized according to UL 94-V0

## **Advantages**

- Easy mounting
- Small size and space saving
- Only one design for wide current ratings range
- High immunity to external interference.

## **Applications**

- AC variable speed drives
- Static converters for DC motor drives
- Battery supplied applications
- Uninterruptible Power Supplies (UPS)
- Switched Mode Power Supplies (SMPS)
- Power supplies for welding applications.

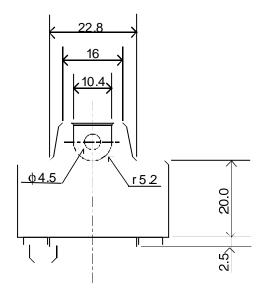

Notes: 1) Pollution class 2, overvoltage category III.

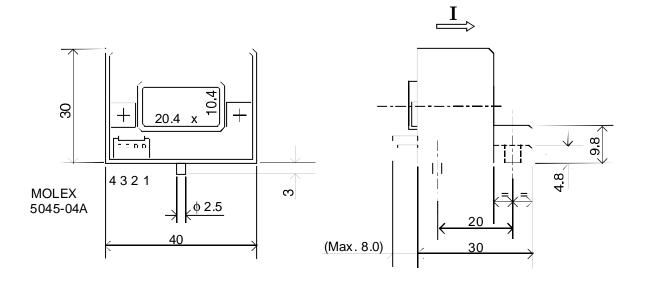

- <sup>2)</sup> Linearity data exclude the electrical offset.
- <sup>3)</sup> Please refer to derating curves in the technical file to avoid excessive core heating at high frequency.
- 4) Please consult characterisation report for more technical details and application advice.
