NOTES

1. The data rate can be increased to 12.5Gbps, but the sensitivity will be decreased by approximately 3dB.
2. P_R is the average optical power at the fiber face.
3. $P_{R\ OMA}$ is the peak to peak optical power at the fiber face (Optical Modulation Amplitude)

$$P_{R\ OMA} = \frac{2P_R\ ER - 1}{ER + 1}$$

where ER is the extinction ratio (linear) of the optical source.

4. Bandwidth and Low Frequency Cutoff are measured with a small signal sinusoidal light source with -10dBm average power
5. Sensitivity is measured with an optical source with an extinction ratio of 3dB.
6. Stressed receiver sensitivity is measured with 3.5dB vertical eye closure (intersymbol interference) and with

0.3UI of jitter added. The measurement technique is defined in IEEE 802.3ae.

7. Rise/Fall times are corrected for optical source Rise/Fall times. The corrected value is calculated as the square root of the difference of the squares of the measured differential detector output and the source.
8. Value shown is with external power supply filtering.
9. For best sensitivity, a limiting amplifier may be required for operation.
10. The PD voltage must be connected to a positive 3.3V power supply (nominal).

ADVANCED OPTICAL COMPONENTS

Finisar's ADVANCED OPTICAL COMPONENTS division was formed through strategic acquisition of key optical component suppliers. The company has led the industry in high volume Vertical Cavity Surface Emitting Laser (VCSEL) and associated detector technology since 1996. VCSELs have become the primary laser source for optical data communication, and are rapidly expanding into a wide variety of sensor applications. VCSELs' superior reliability, low drive current, high coupled power, narrow and circularly symmetric beam and versatile packaging options (including arrays) are enabling solutions not possible with other optical technologies. ADVANCED OPTICAL COMPONENTS is also a key supplier of Fabrey-Perot (FP) and Distributed Feedback (DFB) Lasers, and Optical Isolators (OI) for use in single mode fiber data and telecommunications networks
