Hi-Flow[®] II5-AC

Features and Benefits

- Thermal impedance: 0.37°C-in²/W (@25 psi)
- Can be applied directly to a cold heat sink
- One side adhesive-coated to aid in positioning
- Fiberglass reinforced

Bergquist Hi-Flow 115-AC is a thermally conductive fiber reinforced phase change material. The product consists of a thermally conductive 65°C phase change compound coated on a fiberglass web, and an adhesive coating on one side for attachment to a cold heat sink. There is no need to preheat the heat sink to apply the Hi-Flow 115-AC.

Hi-Flow 115-AC is designed as a thermal interface material between a computer processor and a heat sink. The pressure sensitive adhesive makes it simple to apply in high volume to heat sinks and the 65°C phase change temperature eliminates shipping and handling problems.

Hi-Flow 115-AC requires no protective liner for shipping or handling. The Hi-Flow coating has excellent handling characteristics at room temperature, and can withstand the handling and shipping process without protection.

Hi-Flow 115-AC handles like a Sil Pad at room temperature and flows like high-quality grease at elevated temperatures.

TYPICAL PROPERTIES OF HI-FLOW 115-AC						
PROPERTY	IMPERIAL VALUE		METRIC VALUE		TEST METHOD	
Color	Gray		Gray		Visual	
Reinforcement Carrier	Fiberglass		Fiberglass			
Thickness (inch) / (mm)	0.0055		0.139		ASTM D374	
Elongation (%45° to Warp and Fill)	40		40		ASTM D882A	
Tensile Strength (psi) / (MPa)	900		6		ASTM D882A	
Continuous Use Temp (°F) / (°C)	302		150			
Phase Change Temp (°F) / (°C)	149		65		ASTM D3418	
ELECTRICAL						
Dielectric Breakdown Voltage (Vac)	300		300		ASTM D149	
Dielectric Constant (1000 Hz)	3.5		3.5		ASTM D150	
Volume Resistivity (Ohm-meter)	1010		10 ¹⁰		ASTM D257	
Flame Rating	V-O		V-O		U.L. 94	
THERMAL						
Thermal Conductivity (W/m-K) (1)	0.8		0.8		ASTM D5470	
THERMAL PERFORMANCE vs PRESSURE						
Press	ure (psi)	10	25	50	100	200
TO-220 Thermal Performance (°C/W)		1.28	1.16	1.04	0.94	0.85
Thermal Impedance (°C-in²/W) (2)		0.44	0.37	0.35	0.27	0.15
1) This is the measured thermal conductivity of the Hi-Flow coating. It represents one conducting layer in a three-layer laminate. The						

Fiberglass-Reinforced, Phase Change Thermal Interface Material

Hi-Flow coatings are phase change compounds. These layers will respond to heat and pressure induced stresses. The overall conductivity of the material in post-phase change, thin film products is highly dependent upon the heat and pressure applied. This characteristic is not accounted for in ASTM D5470. Please contact Bergquist Product Management if additional specifications are required. 2) The ASTM D5470 (Bergquist modified) test fixture was used and the test sample was conditioned at 70°C prior to test. The recorded value includes interfacial thermal resistance. These values are provided for reference only Actual application performance is directly related to the surface roughness, flatness and pressure applied

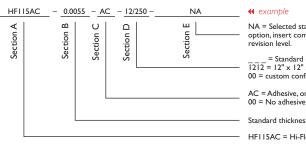

Typical Applications Include:

- Computer and peripherals
- As a thermal interface where bare die is exposed and needs to be heat sinked

Configurations Available:

- Sheet form, die-cut parts, and roll form
- With pressure sensitive adhesive

Building a Part Number

Standard Options

NA = Selected standard option. If not selecting a standard option, insert company name, drawing number, and

____ = Standard configuration dash number; 1212 = 12" x 12" sheets, 12/250 = 12" x 250' rolls, or 00 = custom configuration

AC = Adhesive one side

Standard thicknesses available: 0.0055"

HF115AC = Hi-Flow 115-AC Phase Change Material
