

INTERNAL PULL-UP HALL EFFECT LATCH

Description

AH373 is a single-digital-output Hall-Effect latch sensor with internal pull-up resistor for high temperature operation. The device includes an on-chip Hall voltage generator for magnetic sensing, an amplifier to amplify Hall voltage, and a comparator to provide switching hysteresis for noise rejection, and an output driver with a pull-up resistor. An internal band-gap regulator provides a temperature compensated supply voltage for internal circuits and allows a wide operating supply range.

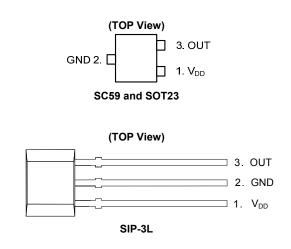

When the magnetic flux density (**B**) perpendicular to the package is larger than operate point (**Bop**), output is switched on (OUT pin is pulled low). The output state is held on until a magnetic flux density reversal falls below Brp. When **B** is less than Brp, the output is switched off.

The AH373 is available in SIP-3L, SC59 and SOT23 packages.

Features

- Bipolar Hall Effect Latch Operation
- 2.2V to 20V Operating Range
- Single Output with Built-in Pull-up Resistor
- 25mA output Sink Capability
- -40°C to +125°C Operating Temperature
- Industry Standard SIP-3L, SC59 and SOT23 Packages
- Totally Lead-Free & Fully RoHS Compliant (Notes 1 & 2)
- Halogen and Antimony Free. "Green" Device (Note 3)

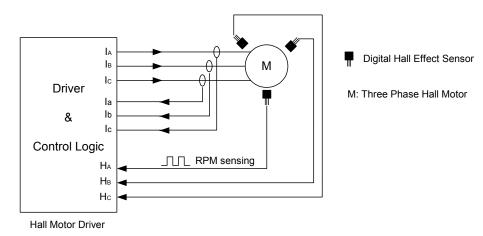

Pin Assignments

Applications

- Rotor Position Sensing for Motor Commutation
- Encoder
- Speed Measurement RPM Monitor
- Contact-less Current Switch
- Notes: 1. No purposely added lead. Fully EU Directive 2002/95/EC (RoHS) & 2011/65/EU (RoHS 2) compliant.
 - 2. See http://www.diodes.com/quality/lead_free.html for more information about Diodes Incorporated's definitions of Halogen- and Antimony-free, "Green" and Lead-free.
 - 3. Halogen- and Antimony-free "Green" products are defined as those which contain <900ppm bromine, <900ppm chlorine (<1500ppm total Br + Cl) and <1000ppm antimony compounds.

Typical Application Circuits

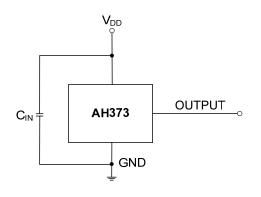

3 Phase Hall Motor

Typical Application Circuits (cont.)

Typical AH373 Circuit

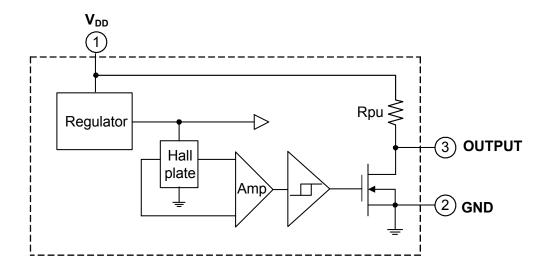

Note: 4. C_{IN} is for power stabilization and to strengthen the noise immunity, the recommended capacitance is 100nF typical

Pin Descriptions

Package: SC59, SOT23 and SIP-3L

| Pin Number | Pin Name | Function |
|------------|-----------------|--------------------|
| 1 | V _{DD} | Power Supply Input |
| 2 | GND | Ground |
| 3 | OUTPUT | Output |

Functional Block Diagram

Absolute Maximum Ratings (Note 5) @T_A = +25°C, unless otherwise specified.)

| Symbol | Characteristics | | Values | Unit |
|------------------------|------------------------------|-------------|--------|------|
| V _{DD} | Supply Voltage (Note 6) | | 28 | V |
| V _{OUT} (Off) | Output "Off" Voltage | 28 | V | |
| l _O (sink) | Output "On" current (sink) | 25 | mA | |
| В | Magnetic Flux Density | Unlimited | | |
| P | Paakaga Dower Dissinction | SIP-3L | 550 | mW |
| PD | Package Power Dissipation | 230 | mW | |
| TS | Storage Temperature Range | -65 to +150 | °C | |
| TJ | Maximum Junction Temperature | +150 | °C | |

Notes: 5. Stresses greater than the 'Absolute Maximum Ratings' specified above may cause permanent damage to the device. These are stress ratings only; functional operation of the device at these or any other conditions exceeding those indicated in this specification is not implied. Device reliability may be affected by exposure to absolute maximum rating conditions for extended periods of time.

6. The absolute maximum V_{DD} of 28V is a transient stress rating and is not meant as a functional operating condition. It is not recommended to operate the device at the absolute maximum rated conditions for any period of time.

Recommended Operating Conditions (@T_A = +25°C, unless otherwise specified.)

| Symbol | Characteristic | Conditions | Rating | Unit |
|-----------------|-----------------------------|------------|-------------|------|
| V _{DD} | Supply Voltage (Note 7) | Operating | 2.2 to 20 | V |
| T _A | Operating Temperature Range | Operating | -40 to +125 | °C |

Note: 7. The output of IC will be switched after the supply voltage is over 2.2V, but the magnetic characteristics will not be normal until the supply is over 2.5V.

Electrical Characteristics (@T_A = +25°C, V_{DD} = 12V, unless otherwise specified.)

| Symbol | Characteristic | Conditions | Min | Тур | Max | Unit |
|------------------|---------------------------|-------------------------|-----|-------|-----|------|
| V _{OUT} | Output On Voltage | I _{OUT} = 20mA | - | 300 | 400 | mV |
| I _{DD} | Supply Current | B < Brp | _ | 2 | 4 | mA |
| I _{OFF} | Output Leakage Current | Output off | _ | < 0.1 | 10 | μA |
| Rpu | Internal Pull-up Resistor | — | 7 | 10 | 13 | kΩ |

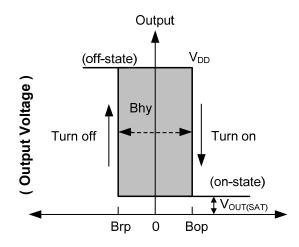

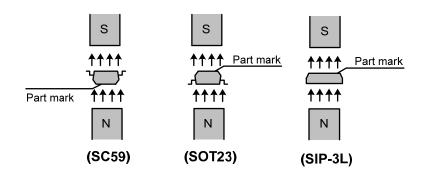

Magnetic Characteristics (Note 8) (@T_A = +25°C, V_{DD} = 2.5V to 20V, unless otherwise specified.)

| | | | | (1mT=10 | Gauss) |
|--|-----------------|-----|-----|---------|--------|
| Symbol | Characteristic | Min | Тур | Max | Unit |
| Bop (South pole to part marking side for SIP-3L and SOT23; North pole to part marking side for SC59) | Operation Point | 5 | 30 | 60 | |
| Brp (South pole to part marking side for SIP-3L and SOT23; North pole to part marking side for SC59) | Release Point | -60 | -30 | -5 | Gauss |
| Bhy (Bopx - Brpx) | Hysteresis | _ | 60 | _ | |

Note: 8. The magnetic characteristics may vary with supply voltage, operating temperature and after soldering.

LIFE SUPPORT

Diodes Incorporated products are specifically not authorized for use as critical components in life support devices or systems without the express written approval of the Chief Executive Officer of Diodes Incorporated. As used herein:

- A. Life support devices or systems are devices or systems which:
 - 1. are intended to implant into the body, or
 - 2. support or sustain life and whose failure to perform when properly used in accordance with instructions for use provided in the labeling can be reasonably expected to result in significant injury to the user.
- B. A critical component is any component in a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or to affect its safety or effectiveness.

Customers represent that they have all necessary expertise in the safety and regulatory ramifications of their life support devices or systems, and acknowledge and agree that they are solely responsible for all legal, regulatory and safety-related requirements concerning their products and any use of Diodes Incorporated products in such safety-critical, life support devices or systems, notwithstanding any devices- or systems-related information or support that may be provided by Diodes Incorporated. Further, Customers must fully indemnify Diodes Incorporated and its representatives against any damages arising out of the use of Diodes Incorporated products in such safety-critical, life support devices or systems.
