CCFL INVERTER

(For Dual Tube Applications)

2/26/07

GENERAL DESCRIPTION

This AC-1654 is designed to power 2 CCFL's up to a power level of 11.5 watts from a +12V source.

Enable control is accomplished @ pin 5 of CON1.

Intensity control (0-100%) is accomplished by the user providing a variable dc level at pin 6 of CON1.

If desired, the pwm dimming frequency of the inverter can be synchronized to the LCD frame rate via pin 8 of CON1.

A +5V reference voltage is available @ pin 7 of CON1 for external use.

This inverter is specifically designed to drive the Sharp 15 inch LGN2A display to a nominal brightness goal of 260 cd/m2.

All outputs are open and short circuit protected.
