

## Hawk 3 Digital Panel Meter / Controller

File # E199939

- All parameters set from easy to understand front panel access
- One, two or four 5-amp relays optional
- Five user-selectable brightness levels
- 1/8 DIN, shallow depth case, 3.24"
- RS485 digital communications optional (H345)
- 12 or 24 DCV Excitation output optional, maximum 30mA @ 12V and 20mA @ 24V
- 4-20mA or 0-10 DCV analog retransmission optional
- NEMA 4X rated front panel

Specifications																																																				
DISPLAY																																																				
Type	7- segment, red LED, 4 or 5 digits																																																			
Height	0.56" (14.2mm)																																																			
Brightness	5 settings, user programmable																																																			
Decimal Point	4 or 5 position, user programmable																																																			
Overrange Indication	Display flashes "EEEE" indicating Maximum Value Exceeded (Example: H335)																																																			
Underrange Indication	Display flashes "-EEE" indicating Minimum Value Exceeded (Example: H335)																																																			
Alarm Indicators	4 LED indicators for up to four independent setpoints																																																			
Linearization	H335 2 points H345 16 points																																																			
POWER REQUIREMENTS																																																				
AC	85 to 250 VAC or 120VAC @ 10VA																																																			
DC	9 to 36 DCV @ 10VA																																																			
Isolation	250V RMS MAX																																																			
Note: Each supply is shown at the maximum and minimum values except the 120 VAC unit, which is allowed $\pm 10\%$

## Hawk 3 Digital Panel Meter / Controller

### Installation and Panel Cutout - H335, H340, H345

#### Mounting Requirements

The Hawk 3 Advanced Digital Controller 1/8 DIN meters require a panel cutout of 1.77" (45mm) high by 3.62" (92mm) wide.

To install the Hawk 3 meter into a panel cutout, remove the clips from the side of the meter.

Slide the meter through the panel cutout, then slide the mounting clips back on the meter. Press evenly to ensure a proper fit. Tighten screws.

#### Engineering Label Placement

To replace the engineering unit label, place the tip of a ballpoint pen into the small hole at the base of the engineering label in the bezel.

Slide the label up until it pops out. Grasp and remove. Slide the new label half the distance in, then use the ballpoint pen to slide it down into place.
