

ACT3A04T (TCXO) ACT3A04VT (VCTCXO)

Compatible with Eu Directive
2002/EC - RoHS

The ACT3A04T/ VT family is a range of low frequency TC/ VCTCXOs housed in through hole packages, with various height options, and provides for tight frequency stabilities across a wide operating temperature and supply voltage range. Parts are available with internal trimmer options. The devices offer good reliability at a low cost and, whilst primarily developed for Communications Applications, they are also very suitable for many other applications including Instrumentation, Phase Locked Loops, Video Game & many Consumer Applications.
